Dubai

This course is an intensive course where theory lessons, demonstrations, and practice between participants alternate throughout the day. It is intended for physiotherapists, osteopaths, medical doctors and chiropractors. Participants will learn to evaluate musculoskeletal dysfunctions, with specific reference to the human fascial system, and to apply the Fascial Manipulation technique as taught by Luigi Stecco.

Lessons include anatomy and physiology of the fascial system, explanation of the biomechanical model used in application of this technique and the anatomical localisation of key fascial points.

The evaluation of musculoskeletal dysfunctions from anamnesis to hypothesis to verification and treatment is emphasized, together with the methodology of treatment and treatment strategies. Register your seats at www.physioseminar.net
